

Medical Diagnostics Form (MDF) for athletes with a Physical Impairment (PI)

The form must be completed in **typed English** by the athlete's individual physician, who signed and sealed the form. The form must be completed and uploaded onto the World Abilitysport - Sports Management System (WA-SMS) no later than six (6) weeks before the next competition that the athlete undergoes athlete evaluation (unless otherwise agreed).

This document does not act as a valid substitute for medical documentation.

Medical documentation providing evidence for the athlete's underlying health condition and impairment, is to be uploaded separately onto the WA-SMS with this form (see page 2).

Following information to be completed typed / electronically:

Athlete information:

Last name: _____

First name: _____

NPC / NF: _____

Gender:

☐ Female

☐ Male

Date of Birth:

(DD.MM.YYYY) _____

Sport: _____

Handedness: ☐ Right

☐ Left

Number of years competing in the sport at a national level: _____

Medical information:

Description (*typed in English*) of the Athlete's medical diagnosis and the loss of function this health condition results in:

Underlying health condition is:

☐ progressive

☐ permanent

Medical history:

Underlying health condition is: ☐ acquired ☐ congenital

If acquired, age of onset:

Anticipated future
procedure(s):

List of medication prescribed:

Attachments:

The athlete's underlying health condition as stated on this form and the resulting impairment must fully explain the loss of function exhibited by the athlete during athlete evaluation. Otherwise, no sport class can be allocated by the classification panel, as stipulated in the International Wheelchair Fencing sport's classification rules.

Therefore, additional, recent (not older than 12 months), and relevant medical documentation must be included separately, in typed English in headed official clinic/hospital paper with this form if the athlete has the following*:

- an impairment or diagnosis that cannot be ascertained by clear signs and symptoms.
- a complex or rare health condition, or multiple impairments.
- limb deficiency or leg length difference (amputation or dysmelia) at the level of an ankle, knee, wrist or elbow joint (X-rays for the respective joints to be enclosed).
- a spinal cord injury (recent ASIA scale results to be enclosed).
- one of the coordination related impairments Motor Ataxia, Dyskinesia (athetosis, dystonia, chorea) or Hypertonia/Spasticity (Australian Spasticity Assessment Scale scores to be enclosed).

Reports on additional testing by physicians, physiotherapists, and other health professionals are welcomed, where relevant, to complement the medical diagnostic information in an English translated typed version.

The Wheelchair Fencing International Classification panel may ask for further information to be submitted depending on the individual athlete's health condition and impairment.

**Athletes and NPCs/ NFs are advised to observe the Eligible Impairments defined in the International Wheelchair Fencing Sport's classification rules, as not all the impairments mentioned above are considered Eligible Impairments in all sports.*
